

## REQUALIFICATION OF QUALIFICATION IN BIOREPOSITORY SCIENCE

### Suggested Subject Areas for Continuing Education\*

---

#### BIOREPOSITORY SCIENCE SUBJECT AREAS:

1. Biorepository operations
2. Data analytics/informatics
3. Enhanced technical areas (e.g., histology, tissue microarray, slide imaging, microdissection, viable cell isolation, nucleic acid/protein extraction)
4. Good clinical practice, including research subject protection
5. Specimen/data collection, handling, processing, and storage
6. Inventory management
7. Quality assurance and quality control
8. Safety

**\*Acceptable continuing education is not limited to the subjects on this list. If you are unsure about the acceptability of a subject, please contact the ASCP Board of Certification.**
